

Women's Health

Women's health is complex, deeply personal, and — for too long — too easily dismissed. At Quantum Health, we believe every woman deserves to be genuinely heard and properly investigated. No long waits. No dismissal. No rushing.

Hormonal Imbalance Testing

Hormonal imbalance can affect everything—your energy, mood, cycle, skin, sleep, and weight. Tests: Oestradiol, FSH, LH, Progesterone, Prolactin, Total Testosterone, SHBG.

Option	Price
Blood test only	£175
Including both consultations	£275

Menopause Check

Perimenopause can begin years before your periods stop. Tests: FSH, LH, Oestradiol, Free T4, TSH. Includes discussion of HRT options where appropriate.

Option	Price
Blood test only	£175
Full package including consultations	£375

PCOS Check

Around 1 in 10 women have PCOS — many go years without a diagnosis. Tests: Testosterone, SHBG, FSH, LH, Glucose, Insulin, Lipid Profile, TSH, HbA1c, plus ovarian and hormonal scan.

Option	Price
Blood test only	£275
Full package incl. scan & consultations	£575

Fertility Check

A complete fertility assessment for women and couples planning ahead — or simply wanting clarity. Testing tailored to your individual circumstances and goals.

Option	Price
Full package including consultations	From £425

Endometriosis Test (ZIGWIG Endotest)

The average NHS endometriosis diagnosis takes 7.5 years. The ZIGWIG Endotest uses advanced multi-biomarker analysis through a saliva and blood sample. Clinician assessment and results review included.

Option	Price
Full package including consultation and results review	£995

Pregnancy Confirmation Test (Beta-HCG)

Blood test to confirm pregnancy at the earliest possible stage—more sensitive than over-the-counter tests, with results reviewed by a clinician.

Option	Price
Pregnancy Confirmation (Beta-HCG)	£80

Down Syndrome Risk Assessment

Clinically validated screening assessment to evaluate the risk of Down syndrome during pregnancy. Available with or without a consultation appointment.

Option	Price
Blood test only	£275
Including clinician review	£375

Frequently Asked Questions

Q · When should I book a hormone panel?

If you are experiencing irregular periods, unexplained fatigue, low mood, skin or hair changes, or any symptoms that feel hormonal — even if you have been told they are 'normal' — a hormone panel is an excellent place to start.

Q · Is the menopause check relevant if I'm still having periods?

Yes. Perimenopause often begins years before periods stop and can cause significant symptoms throughout. Our clinicians interpret results in the context of your individual experience.

Q · Do I need a referral?

No referral needed for any of our women's health services. Book online or call us directly.
